

Administration (ETA), United States Employment Services (USES) has taken the first step to establish performance measures for the public labor exchange programs and labor exchange function for the Workforce Development and One-Stop Career Center service delivery systems.

The United States Employment Service (USES) worked cooperatively with States and other stakeholders to develop program specific performance measures. Performance measures were proposed and comments from stakeholders were requested in the **Federal Register** (63 FR 32564-32578).

The proposed measures are a starting point for development of comprehensive measures for the labor exchange function of the emerging Workforce Development system. It is the Department's intent to use the comments received to develop

performance measures for implementation on July 1, 2000.

The effort to finalize the performance measures, to identify the data elements needed to produce the performance measures and to define specific changes to the ETA reporting requirements will take several months to accomplish the transition to a new reporting system. States will also need time to make the necessary procedural, reporting, and computer software changes that will be necessary. This may be complicated by State efforts to respond to necessary computer program changes for Year 2000 compliance.

In consideration of these issues, the Department is requesting an extension of the Employment Service Program Reporting System without changes from the current end date of August 31, 1999 to a new end date of June 30, 2000.

This is a request for OMB approval under the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)) to extend collection of the Employment Service Program Reporting System data previously approved and assigned OMB Control No. 1205-0240 and the data reporting for the ETA 9002 A, B, C, including the data reporting for the VETS 200 A and B, VETS 300, the manager's report on services to veterans and recordkeeping.

Electrical Standards for Construction; Information Collection Requirements

ACTION: Notice; Opportunity for public comment.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and impact of collection requirements on respondents can be properly assessed. Currently, the Occupational Safety and Health Administration (OSHA) is soliciting comments concerning the proposed extension of the information collection requirements contained in the Electrical Standards for Construction (29 CFR part 1926, Subpart K). The Agency is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the

functions of the Agency, including whether the information will have practical utility;

- Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- Enhance the quality, utility, and clarity of the information to be collected; and

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

SUPPLEMENTARY INFORMATION:

I. Background

The Occupational Safety and Health Act of 1970 (the Act) authorizes the promulgation of such health and safety standards as are necessary or appropriate to provide safe or healthful employment and places of employment. The statute specifically authorizes information collection by employers as necessary or appropriate for the enforcement of the Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents.

The written description of the Assured Equipment Grounding Conductor Program (AEGP) required by § 1926.404(b)(1)(iii) allows employers, employees, and OSHA compliance officers to determine how the requirements of the standard are being met, including the method of recording tests. For example, the employer's written program might specify the use of yellow tape to color code every tool and cord set. By referring to the written program, OSHA compliance officers and other persons can easily determine if the employer is complying with the program.

The posting of warning signs enables employees to avoid accidental contact of electrical equipment used on construction sites. Contact with unguarded live electrical parts, especially at high voltage, can be hazardous to employees.

The tagging of controls, equipment and circuits is intended to prevent the inadvertent reactivation of the controls, equipment and circuits while they are being serviced.
