 UL 1564 Industrial Battery Chargers  
 UL 1574 Track Lighting Systems  
 UL 1740 Industrial Robots and Robotic Equipment  
 UL 1838 Low Voltage Landscape Lighting Systems  
 UL 2044 Commercial Closed Circuit Television Equipment  
 UL 2161 Neon Transformers and Power Supplies  
 UL 3044 Surveillance Closed Circuit Television Equipment

The designations and titles of the above test standards were current at the time of the preparation of this notice.

OSHA's recognition of MET, or any NRTL, for a particular test standard is limited to equipment or materials (*i.e.*, products) for which OSHA standards require third party testing and certification before use in the workplace. Consequently, an NRTL's scope of recognition excludes any product(s) falling within the scope of a test standard for which OSHA has no NRTL testing and certification requirements.

Many of the Underwriters Laboratories Inc. (UL) test standards listed above also are approved as American National Standards by the American National Standards Institute (ANSI). However, for convenience, we use the designation of the standards developing organization (*e.g.*, UL 325) for the standard, as opposed to the ANSI designation (*e.g.*, ANSI/UL 325). Under our procedures, any NRTL recognized for an ANSI-approved test standard may use either the latest proprietary version of the test standard or the latest ANSI version of that standard. Contact "NSSN" (<http://www.nssn.org>), an organization partially sponsored by ANSI, to find out whether or not a test standard is currently ANSI-approved.

#### Preliminary Finding

MET has submitted an acceptable request for expansion of its recognition as an NRTL. Following a review of the application file, the assessor's recommendation, and other pertinent information, the NRTL Program staff has concluded that OSHA can grant to MET the expansion for the additional test standards listed above. The staff therefore recommended to the Assistant Secretary that the application be preliminarily approved.

Based upon the recommendation of the staff, the Assistant Secretary has made a preliminary finding that MET Laboratories, Inc., can meet the requirements as prescribed by 29 CFR 1910.7 for expansion of its recognition.

OSHA welcomes public comments, in sufficient detail, as to whether MET has met the requirements of 29 CFR 1910.7 for expansion of its recognition as a Nationally Recognized Testing Laboratory. Your comments should consist of pertinent written documents and exhibits. To consider it, OSHA must receive the comment at the address provided above (*see ADDRESSES*), no later than the last date for comments (*see DATES* above). Should you need more time to comment, OSHA must receive your written request for extension at the address provided above no later than the last date for comments. You must include your reason(s) for any request for extension. OSHA will limit an extension to 30 days, unless the requester justifies a longer period. We may deny a request for extension if it is frivolous or otherwise unwarranted. You may obtain or review copies of MET's request, the memo on the recommendation, and all submitted comments, as received, by contacting the Docket Office, Room N2625, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address. You should refer to Docket No. NRTL1-88, the permanent record of public information on MET's recognition.

The NRTL Program staff will review all timely comments and, after resolution of issues raised by these comments, will recommend whether to grant MET's expansion request. The Assistant Secretary will make the final decision on granting the expansion and, in making this decision, may undertake other proceedings that are prescribed in Appendix A to 29 CFR 1910.7. OSHA will publish a public notice of this final decision in the **Federal Register**.

Signed at Washington, DC, this 11th day of June, 2003.

**John L. Henshaw,**

*Assistant Secretary.*

#### DEPARTMENT OF LABOR

##### Occupational Safety and Health Administration

[Docket No. NRTL3-92]

##### TUV Rheinland of North America, Inc., Expansion of Recognition; NSF International, Correction of Recognition

**AGENCY:** Occupational Safety and Health Administration (OSHA), Labor.

**ACTION:** Notice.

**SUMMARY:** This notice announces the Agency's final decision on the application of TUV Rheinland of North America, Inc., for expansion of its recognition as a Nationally Recognized Testing Laboratory under 29 CFR 1910.7. In an unrelated matter, this notice also includes a correction of recognition to include an additional test standard for NSF International.

**EFFECTIVE DATE:** This recognition becomes effective on June 20, 2003, and, unless modified in accordance with 29 CFR 1910.7, continues in effect while TUV remains recognized by OSHA as an NRTL.

**FOR FURTHER INFORMATION CONTACT:** Sherrey Nicolas, Office of Technical Programs and Coordination Activities, NRTL Program, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N3653, Washington, DC 20210, or phone (202) 693-2110.

#### SUPPLEMENTARY INFORMATION:

##### Notice of Final Decision

The Occupational Safety and Health Administration (OSHA) hereby gives notice of the expansion of recognition of TUV Rheinland of North America, Inc. (TUV), as a Nationally Recognized Testing Laboratory (NRTL). TUV's expansion covers the use of additional test standards. OSHA's current scope of recognition for TUV may be found in the following informational Web page: <http://www.osha-slc.gov/dts/otpc/nrtl/tuv.html>.

OSHA recognition of an NRTL signifies that the organization has met the legal requirements in § 1910.7 of Title 29, Code of Federal Regulations (29 CFR 1910.7). Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within its scope of recognition and is not a delegation or grant of government authority. As a result of recognition, employers may use products "properly certified" by the NRTL to meet OSHA standards that require testing and certification.

The Agency processes applications by an NRTL for initial recognition or for expansion or renewal of this recognition following requirements in Appendix A to 29 CFR 1910.7. This appendix requires that the Agency publish two notices in the **Federal Register** in processing an application. In the first notice, OSHA announces the application and provides its preliminary finding and, in the second notice, the Agency provides its final decision on an application. These notices set forth the

NRTL's scope of recognition or modifications of this scope.

TUV submitted its application to expand its recognition to use 132 additional test standards on October 16, 2001 (see Exhibit 28). The NRTL Program staff has determined that 17 of the 132 standards cannot be included in the expansion because they are not "appropriate test standards," within the meaning of 29 CFR 1910.7(c). The staff makes such determinations in processing expansion requests from any NRTL. Therefore, OSHA is including 115 standards in the expansion, as listed below. OSHA performed an on-site review of the NRTL in June 2002 and recommended the expansion in a memo dated October 17, 2002 (see Exhibit 29).

OSHA published the notice of its preliminary findings on the expansion request in the **Federal Register** on March 4, 2003 (68 FR 10269). The notice requested submission of any public comments by March 19, 2003. OSHA did not receive any comments pertaining to the application.

The previous notice published by OSHA for TUV's recognition covered a renewal of recognition, which became effective on March 18, 2002 (67 FR 12051).

You may obtain or review copies of all public documents pertaining to the TUV application by contacting the Docket Office, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Room N2625, Washington, DC 20210. You should refer to Docket No. NRTL3-92, the permanent record of public information on TUV's recognition.

The current address of the testing facility (site) that OSHA recognizes for TUV is: TUV Rheinland of North America, Inc., 12 Commerce Road, Newtown, Connecticut 06470.

#### Existing Condition

Currently, OSHA imposes the following condition on its recognition of TUV. This condition is listed first under the "Conditions" section, which is the last section of this notice, and applies also to this expansion for additional test standards. As mentioned in previous notices, such a special condition applies solely to TUV's NRTL operations, and it is in addition to any other condition that OSHA normally imposes in its recognition of any organization as an NRTL.

#### Final Decision and Order

The NRTL Program staff has examined the applications, the on-site review report, and other pertinent information. Based upon this

examination and the assessor's recommendation, OSHA finds that TUV Rheinland of North America, Inc., has met the requirements of 29 CFR 1910.7 for expansion of its recognition to include the additional test standards subject to the limitation and conditions listed below. Pursuant to the authority in 29 CFR 1910.7, OSHA hereby expands the recognition of TUV, subject to this limitation and these conditions.

#### Limitation

OSHA limits the expansion to testing and certification of products for demonstration of conformance to the following 115 test standards, and OSHA has determined the standards are "appropriate," within the meaning of 29 CFR 1910.7(c).

ANSI A17.5 Elevators and Escalator Electrical Equipment  
ANSI A90.1 Safety Standard for Belt Manlifts

- UL 61058-1 Switch for Appliances for Household and Similar Applications

OSHA's recognition of TUV, or any NRTL, for a particular test standard is limited to equipment or materials (*i.e.*, products) for which OSHA standards require third party testing and certification before use in the workplace. Consequently, an NRTL's scope of recognition excludes any product(s) that fall within the scope of a test standard, but for which OSHA standards do not require NRTL testing and certification.

Many of the test standards listed above are approved as American National Standards by the American National Standards Institute (ANSI). However, for convenience in compiling the list, we often use the designation of the standards developing organization (*e.g.*, UL 1029) for the standard, as opposed to the ANSI designation (*e.g.*, ANSI/UL 1029). Under our procedures, an NRTL recognized for an ANSI-approved test standard may use either the latest proprietary version of the test standard or the latest ANSI version of that standard, regardless of whether it is currently recognized for the proprietary or ANSI version. Contact "NSSN" (<http://www.nssn.org>), an organization partially sponsored by ANSI, to find out whether or not a test standard is currently ANSI-approved.

#### Conditions

TUV must also abide by the following conditions of the recognition, in addition to those already required by 29 CFR 1910.7:

TUV must have specific written testing procedures in place before testing products covered by any test standard for which it is recognized and must use these procedures in testing and certifying those products;

OSHA must be allowed access to TUV's facility and records for purposes of ascertaining continuing compliance with the terms of its recognition and to investigate as OSHA deems necessary;

If TUV has reason to doubt the efficacy of any test standard it is using under this program, it must promptly inform the test standard developing organization of this fact and provide that organization with appropriate relevant information upon which its concerns are based;

TUV must not engage in or permit others to engage in any misrepresentation of the scope or conditions of its recognition. As part of this condition, TUV agrees that it will allow no representation that it is either a recognized or an accredited Nationally Recognized Testing Laboratory (NRTL) without clearly indicating the specific equipment or material to which this recognition is tied, or that its recognition is limited to certain products;

TUV must inform OSHA as soon as possible, in writing, of any change of ownership, facilities, or key personnel, and of any major changes in its operations as an NRTL, including details;

TUV will meet all the terms of its recognition and will always comply with all OSHA policies pertaining to this recognition; and

TUV will continue to meet the requirements for recognition in all areas where it has been recognized.

#### Notice of Correction

With respect to Docket No. NRTL2-98, NSF International (NSF) applied for a test standard listed below as part of their original expansion request but inadvertently left it out in the later version of that request. OSHA is expanding the recognition of NSF to include UL 563 Ice Makers, which requires the same type of capabilities as other test standards approved for their expansion request dated June 25, 2002 (see exhibit 10). This action is unrelated to our expansion of TUV's recognition. We include it herein only for convenience in processing.

Signed at Washington, DC, this 11th day of June, 2003.

**John L. Henshaw,**  
Assistant Secretary.
