### Attachment—Confirmatory Order Modifying License of Cammenga and Associates, LLC

#### UNITED STATES OF AMERICA

#### NUCLEAR REGULATORY COMMISSION

In the Matter of  
Cammenga and Associates, Inc.  
Dearborn, Michigan  
Docket Nos. 03038679  
License Nos. 21–26460–03E  
SSD Registration No.: NR–0210–D–101–E  
EA–21–157

#### CONFIRMATORY ORDER MODIFYING LICENSE

#### EFFECTIVE UPON ISSUANCE

#### I

Cammenga and Associates, LLC, (Cammenga or Licensee) is the holder of Materials License No. 21–26460–03E and Sealed Source and Device Registration (SSD) Certificate No. NR–0210–D–101–E issued by the U.S. Nuclear Regulatory Commission (NRC) pursuant to Part 30 and 32 of Title 10

of the *Code of Federal Regulations* (10 CFR). The license authorizes Cammenga to distribute products containing byproduct material (tritium, hydrogen-3) to persons exempt from the regulations. For the products authorized under License No. 21–26460–03E, an SSD is required and is captured as a License Condition in the license. The SSD identifies the models that are authorized for distribution under the license.

This Confirmatory Order is the result of an agreement reached during an alternative dispute resolution (ADR) mediation session conducted on June 28, 2022.

#### II

The NRC conducted investigations in 2021 (OI Case No. 3–2021–008) related to apparent violations by Cammenga regarding the distribution of products containing byproduct material (hydrogen-3) without the required licensing authorization.

On March 17, 2022, the NRC issued a letter to Cammenga that detailed the results of the investigation and outlined two apparent violations. The first apparent violation involved Cammenga's failure to limit its distribution of self-luminous products to the products authorized in its NRC License No. 21–26460–03E. The product was listed on a redistributor's website as the Tritium Pry Bar. Specifically, between late 2020 and January 27, 2021, the licensee distributed to an unlicensed entity at least 25 Tritium Pry Bars that were not included in the products authorized in NRC License No. 21–26460–03E, in accordance with NRC SSD registration certificate No. NR–0210–D–101–E. The second apparent violation involved Cammenga's failure to limit its distribution of self-luminous products to the products authorized in its NRC License No. 21–26460–03E. The product was listed on a redistributor's website as the Tritium Glow Fob. Specifically, between late 2020 and January 27, 2021, the licensee distributed to an unlicensed entity at least 10 Tritium Glow Fobs that were not included in the products authorized in NRC License No. 21–26460–03E, in accordance with NRC SSD registration certificate No. NR–0210–D–101–E.

The failure to conduct activities in accordance with a license is significant because it resulted in the NRC not being able to conduct its regulatory responsibilities to ensure that the products were safe for distribution to members of the public, and it inhibited the process of regulatory oversight.

The NRC determined that regarding the first violation identified in the March 17, 2022, letter, Cammenga's actions were willful. Specifically, Cammenga distributed 25 products containing tritium, identified in the March 17, 2022, letter as the Tritium Pry Bar. The NRC's determination of willfulness was not based on a finding that Cammenga deliberately intended to violate NRC requirements, but rather on Cammenga's careless disregard in failing to pursue necessary actions to ensure Cammenga's compliance. Willful violations are of significant concern to the NRC because the NRC's regulatory programs rely upon the integrity of entities, applicants, and licensees
