

SUPPLEMENTARY INFORMATION: DOL, as part of continuing efforts to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies an opportunity to comment on proposed and/or continuing collections of information before submitting them to the Office of Management and Budget (OMB) for final approval. This program helps to ensure requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements can be properly assessed.

The data submitted annually on the ETA 204 report enables ETA to project revenues for the Unemployment Insurance (UI) program on a state-by-state basis and to measure the variations in assigned contribution rates that result from different experience rating systems. Used in conjunction with other data, the ETA 204 report assists in determining the effects of certain factors (e.g., stabilization, expansion, or contraction in employment, etc.) on the unemployment experience of various groups of employers. The data also provide an early signal for potential solvency problems and are useful in analyzing factors that give rise to these potential problems and permit an evaluation of the effectiveness of the various approaches available to correct the detected problems. The report collects annual information about the taxation efforts in states relative to both taxable and total wages and allows comparison between states. Further, the data are key components to the Significant Tax Measures Report. The Significant Tax Measures Report provides the information necessary to evaluate and compare state UI tax systems. 44 U.S.C. 3506(c)(2)(A) authorizes this information collection.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6.

Interested parties are encouraged to provide comments to the contact shown in the **ADDRESSES** section. Comments must be written to receive consideration, and they will be

summarized and included in the request for OMB approval of the final ICR. In order to help ensure appropriate consideration, comments should mention OMB control number 1205–0164.

Submitted comments will also be a matter of public record for this ICR and posted on the internet, without redaction. DOL encourages commenters not to include personally identifiable information, confidential business data, or other sensitive statements/information in any comments.

DOL is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

Impoundments are structures that can impound water, sediment, or slurry or any combination of materials; and refuse piles are deposits of coal mine waste (other than overburden or spoil) that are removed during mining operations or separated from mined coal and deposited on the surface. The failure of these structures can have a devastating effect on a community. To avoid or minimize such disasters, standards have been promulgated for the design, construction, and maintenance of these structures; for annual certifications; for certification for hazardous refuse piles; for the frequency of inspections; and the methods of abandonment for impoundments and impounding structures.
