SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, the collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary

duplication of effort in obtaining information (29 U.S.C. 657).

The following sections describe who uses the information collected under each requirement, as well as how they use it. In the event that a worker is injured while operating a mechanical power press, 29 CFR 1910.217(g) requires the employer to report, within 30 days of the occurrence, all point-of-operation injuries to the operators or other employees to either the Director of the Directorate of Standards and Guidance at OSHA, U.S. Department of Labor, Washington, DC 20210 or electronically at <http://www.osha.gov/pls/oshaweb/mechanical.html>; or to the State agency administering a plan approved by the Assistant Secretary of Labor for Occupational Safety and Health. This information includes the employer's and worker's name(s), workplace address and location; injury sustained; task being performed when the injury occurred; number of operators required for the operation and the number of operators provided with controls and safeguards; cause of the incident; type of clutch, safeguard(s), and feeding method(s) used; and means used to actuate the press stroke. These reports are a source of up-to-date information on power press machines. Specifically, this information identifies the equipment used and conditions associated with these injuries.

OSHA's Mechanical Power Press injury reporting requirement at 1910.217(g) is a separate injury reporting requirement from OSHA's severe injury reporting requirements which are part of 1904.39. Under 1904.39, employers must, within 24 hours, report to OSHA any work-related injury requiring hospitalization as well as work-related incidents resulting in an amputation or loss of an eye. The Mechanical Power Press Standard requires employers to report all injuries involving operation of a power press to OSHA or an appropriate state agency within 30 days. Injuries that must be reported under 1910.217(g) include those that are also reportable under 1904.39 as well as those that are recordable under the recordkeeping standard (29 CFR 1904).

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the

information collection requirements, including the validity of the methodology and assumptions used;

- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in Reports of Injuries to Employees Operating Mechanical Power Presses. The agency is requesting an adjustment decrease in burden hours amount from 390 to 320, a total reduction of 70 burden hours because there is a decrease in the estimated number of injury reports caused by mechanical power presses (from 1,170 to 960).

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.

SUPPLEMENTARY INFORMATION:

Title of Collection: Systematics Scientists Community Survey.

OMB Number: 3145-NEW.

Type of Request: Intent to seek approval to establish an information collection.

Abstract: The Systematics and Biodiversity Science Cluster (SBS) of the Division of Environmental Biology (DEB) at the National Science Foundation (NSF) supports research and methods development that advances understanding of the diversity, systematics, distribution and evolutionary history of extant and extinct organisms. SBS has a longstanding commitment to support research and taxonomic capacity building across the breadth of life on earth.

SBS requests the Office of Management and Budget (OMB) approval to initiate a new survey that will capture the current state of systematic research in the U.S. across subdisciplines, taxonomic groups, and scientific training and ranks.

Use of the Information: Individual survey responses will not be identifiable to the respondent. Aggregate results from the survey will be analyzed and summarized for internal SBS use. The data collected and analyzed will be used for program planning, management, and evaluation purposes. Analyzed data in aggregate may be used in a white paper reporting on the state of systematics science in the U.S. These data are needed for effective administration, program monitoring, evaluation, and for strategic planning within SBS.

Expected Respondents: The respondents will be scientists that self-identify as systematists.

Estimate of Burden:

Estimates of Annualized Cost to Respondents for the Hour Burdens: The overall annualized cost to the respondents is estimated to be \$6,730. The following table shows the estimated burden and costs to respondents, who are generally biologists at the postsecondary level. This estimated hourly rate is based on a report from the Bureau of Labor Statistics' Occupational Employment and Wages, May 2021.¹ According to this report, the median hourly rate is \$33.65.

Collection title	Total number of respondents	Burden hours per respondent	Total hour burden	Average hourly rate	Estimated cost
Survey of Systematists	800	.25	200	\$33.65	\$6,730
